Relaxed Fringe Wall Hanging

This easy yarn art will add soft texture to any room of your home. Choose your favorite color for a monochrome look, or add in a pop of color for contrast.

WALL HANGING

Step 1: Using a mat or cardboard, wrap the yarn the amount of times listed below:

- 13" (33 cm): 104 times with A
24" (61 cm): 270 times with B
18" (46 cm): 130 times with C

Once you finish wrapping each color, cut the yarn.

TIP: To cut the yarn more easily, hold one end of the wrapped yarn strands, slide the yarn off the mat or cardboard, and cut across the opposite end.

Step 2: Pull the strands apart and group them together as follows:

- A: 13 groups of 8 strands
B: 27 groups of 10 strands
C: 26 groups of 5 strands

Step 3: Cut one strand of C that is 26" (66 cm) long.

Step 4: To create base layer of fringe, lay the dowel flat. With one group of B,

fold the strands in half to make a loop at the top. Place the group behind the dowel.

Pull the long end of the yarn through the loop.

Pull to tighten.

2015 - 2018 WOMEN'S CHOICE AWARD AMERICA'S MOST RECOMMENDED YARN BRAND

LM6194 Relaxed Fringe Wall Hanging

Step 5: Repeat step 4 with the other 26 **B** groups. Once you have finished all 27 groups, tie the single strand of 26" (66 cm) **C** you cut earlier to each end of the dowel. Let it hang in front of the **B** groups

Step 6: Using the same loop knot as in step 4, attach the 26 **C** groups to the single strand of **C**.

Step 7: Repeat step 6 with the 13 **A** groups, placing the first group of **A** between the first two groups of **C**, then adding the **A** groups between every 2

C groups. When you finish, you should have one **C** group at each end.

Step 8: Cut three 30" (76 cm)-long strands of **C**. Holding the three strands together, tie them to one end of the wooden dowel.

Braid the three strands, then tie the braid ends to the other dowel end.

Step 9: Tuck the ends of the tied braid under the knots at each dowel end.

Step 10: Pull the **C** groups up and fold them over the dowel. Trim the edges of the **C** groups, giving them a rounded edge. Return the **C** groups to their place.
